

## SCREEN TIME

How often do you clean your flatscreen TV? Once a week? Couple of times a month? Only when you can no longer make out the sex of the people on it? Well regardless of your screen hygiene regime, what you may not know is that cleaning them improperly may result in damaging them! But, don't panic, finally there's a simple, all-in-one solution to dirty flatscreens, namely the OneClean Classic from AM. Coming in a neat little design from Claus Jensen and Henrik Holbaek (also responsible for some Georg Jensen designs), the anodised aluminium case contains a 30ml cleaning spray and a soft foam microfibre pad for ensuring a streak-free finish. So stop squinting at the build up of filth on your flatpanel and treat your eyes to clean screen again.
