

RUB-A-DUB SCREEN CLEANER

AM Denmark OneClean Classic

£15 www.bbg-av.com 01923 205 605

Flatscreen televisions or computer monitors are best cleaned with a microfibre material, because the round fibres and soft ends prevent the scratching that a cleaner like kitchen roll will cause. And any cleaning solution should be alcohol-free to avoid smearing or screen damage. The OneClean Classic kit consists of a water-based spray in a stylish aluminium case with a built-in microfibre pad. Given that the OneClean looks like a groovy hip flask, you won't mind it sitting by your TV, letting you spray and wipe without hunting around for a cleaner. The company recommends that your screen is switched off and cool before you set about cleaning it, and in tests the results of our efforts with OneClean were truly pristine. Refills are available separately.
