

Clean up your act

YOU'VE GOT YOUR fancy new flatscreen, but it's starting to gather dust. So, what should you do? Give it the once-over with a bit of kitchen roll?

If the answer is yes, then it's more than likely that you're leaving scratches all over your hard-earned gogglebox. Cue AM Products – a company that has introduced a stylish range of products to clean your flatscreen TV without damaging it. The iClean Screen Cleaner, available for £19.99, comes in a

black or white acrylic package containing 35ml of alcohol-free cleaning fluid, while the rear face of the container carries a soft foam-backed microfibre pad. A £14.99 version – the OneClean Classic – is also available, as well as a £9.99 version fashioned from transparent acrylic, known as the OneClean Vision.
